

This book explores why the Organization for Security and Cooperation in Europe (OSCE) remains a largely unknown entity as far as the general public are concerned, despite its significant day-to-day activity not only on the diplomatic front, but also via its 16 field operations. While the main achievement of its predecessor, the Conference for Security and Cooperation in Europe (CSCE), was to bridge the East-West divide in Europe during the Cold War, the CSCE was transformed into the OSCE in 1995 to respond to the various challenges generated by the emergence of a multipolar world. Ever since, the OSCE has been involved in diplomacy, empowered with instruments of persuasion rather than coercion. Is the OSCE a significant regional organization in dealing with international security? Has the OSCE been able to reinvent itself to face the post-Cold War world? What type of security is the OSCE providing to its member states? This book provides a variety of answers based on different theoretical perspectives and invites the reader to reflect on the nature of soft power within international relations.

Thirty Seconds Over Tokyo, Karl Marx and the Close of His System: A Criticism (Classic Reprint), A Nazi Legacy: Right-Wing Extremism in Postwar Germany, The World Is Flat, A History of Socialism, Japanese Impressions, with a Note on Confucius, Kaiser Otto der Grosse aus dem alten Hause Sachsen und sein Zeitalter (German Edition), Essays in Socialism and Philosophy, Muslims under non-Muslim Rule. Ibn Taymiyya, Aza ou le Negre (MHR Critical Texts t. 27) (French Edition),
